Education

University of Petroleum and Energy Studies (UPES)
B.Tech in Computer Science Engineering

2025 – Present

Technical Skills

Languages: Python, C, JavaScript (learning), SQL, MongoDB

Frameworks & Tools: Flask, Selenium, Git, Linux

Cloud: AWS, Azure

Concepts: Data Structures & Algorithms, Automation Systems, REST APIs, AI/ML

Projects

WheelsOnRent – Vehicle Rental Platform

- Developed a secure backend system with user authentication and OTP-based verification
- Implemented a vendor dashboard for intuitive vehicle inventory and booking management
- Designed and deployed RESTful APIs for vehicle listing, search, and reservation workflows

Banking System – Terminal-Based Application in C

- Built a menu-driven banking simulator supporting account creation, deposits, withdrawals, and balance inquiry
- Applied structured programming principles and file handling for persistent data storage

CodeHustle (Hypervision Hackathon Platform)

- Contributed to frontend development and feature integration for the hackathon management portal
- Collaborated with the technical team to optimize UI responsiveness and user onboarding flow

Certifications

- AWS Cloud Practitioner Certification
- Oracle AI/ML Foundations Certification
- IIT Jodhpur: Cyber Security Essentials

Leadership & Activities

- **Lead Changemaker** – Drove student-led initiatives focused on tech-for-good projects
- **Core PR Team Member**, ACM-UPES – Managed outreach, communications, and event promotion
- **Core Technical Team Member**, UPES Hypervision – Supported hackathon infrastructure and participant coordination

Interests

Artificial Intelligence, Automation Systems, FinTech, AI/ML Applications, Cyber Security
